TRIVALENT finishes, the Green future of galvanisation.

Cromoplastica renews its commitment to the care and protection of environment with nine new green finishes. The main feature is the use of trivalent chrome. The aim is to gradually replace actual chrome finishes, according to the market demands and customer necessities, with elimination of dangerous substances and drastic reduction of CO_2 emissions, maintaining and improving anti-corrosion performances and resistances on salt tests NSS-AASS-CASS, synthetic sweat, ageing test and perfume contacts.
